

HELO RONDO

HELO RONDO

THE PLEASURE OF HEAT

Helo Rondo is the latest addition to Helo's range of heat-accumulating ever-ready heaters. Rondo is round, and also the patented lid turns a full 360 degrees, opening up entirely new possibilities for sauna interior design. The heater outer shell is stylish brushed stainless steel and the lid is silvery.

The heater is controlled digitally by Rondo's own Midi RA-19 controller. You can set the standby heat level and produce different types of steam by easily adjusting the heat of the stones.

Under the lid, Rondo holds a massive 90 kg of heat-storing stones. The warmth-accumulating heater works great even when heated a single time – during times, for example, when the sauna is not used regularly.

Rondo is a freestanding floor mounted heater, which can also be integrated into the seating area. Protective distance around the heater is only 10 mm, and above the heater 1 040 mm free space is required.

Helo Rondo is 500 mm in diameter of, 860 mm high and weighs about 43 kg.

| TYPE | POWER (kW) | SAUNA SIZE (m ³) |
|---------------|------------|------------------------------|
| HELO RONDO 45 | 4.5 | 5.0-8.0 |
| HELO RONDO 65 | 6.5 | 7.0-13.0 |
| HELO RONDO 96 | 9.6 | 10.0-18.0 |
