

KARHU SAUNA HEATER

Kastor has been crafting wood-burning sauna heaters for more than 100 years. We know what it takes to create the most relaxing, pleasurable and healthful sauna experience imaginable. For instance, through our technological and engineering expertise we get the most heat from the least amount of wood. High-quality Kastor wood-burning sauna heaters are made in Finland. Karhu's handsome lines and chrome front panel will highlight any sauna décor.

Karhu

We have renewed our Kastor Karhu product family to offer a more compact assortment that covers saunas from 12 to 40 m³. Karhu's handsome lines and chrome front panel will highlight any sauna décor. Renewed construction lightens the weight of the heater without compromising heating efficiency. New Karhu heaters require smaller safety distances that bring flexibility to

sauna design. As before, protective wall element and plate are available as accessories. All Karhu heaters can be also raised or lowered as needed thanks to adjustable legs. Karhu wood-burning sauna heaters are CE-marked and all models are now equipped with a 115 mm flue opening from above or behind the heater.
